EXPERIENCE

Associate Software Engineer | Ekaggata Technologies

May 2023 - Nov 2023

I have designed and implemented multiple web views within Odoo to facilitate the efficient management of critical business information and transactional data across various stores. These web views have been phenomenal in tracking and managing refund details for our company's extensive store network.

Technologies: Python, XML, ODOO, PostgreSQL, Linux

PROJECTS

1. [Coinkeeper](#) | [GitHub Link](#)

CoinKeeper is an expense tracking web application designed to help you keep track of your finances. With Coinkeeper, you can easily monitor your expenses, categorize them, and gain insights into your spending habits.

Technologies: Node.js, Express.js, MongoDB (with Mongoose), EJS (Embedded JavaScript templates), Bootstrap (for styling), bcrypt (for password hashing), jsonwebtoken (for authentication)

2. [NoteNexus](#) | [GitHub Link](#)

NoteNexus is a note-taking application built using **Node.js, Express, MongoDB, and EJS**, with additional support for guest access, authentication, and a clean user interface.

Technologies: Node.js, Express.js, MongoDB (with Mongoose), EJS (Embedded JavaScript templates), Tailwind CSS,), bcrypt (for password hashing), jsonwebtoken (for authentication), node-cron (for scheduling automated tasks like deleting inactive users.)
